

stones, shades (for Mark So)

collect some stones together,
very close in tone

(arrange as you like, ascending)

rub two together for a while,
so it gives some shade to a space
then add two others together,

shading the space with the two tones now,
for a while,

stop. (a while)

continue through the stones in such a way,
so that each new tone
is slightly higher than the last.
